THE FATHER OF ROBOTICS

ROBOT forced task (Czech)

MULTIVAC

- ✿ World's most powerful fictitious computer
- ✿ Computer programmers are considered Grandmasters, bright minds, restless and creative
- ✿ Many of the stories with an ironic tone

I, ROBOT

PUBLISHED
1950

✿ **A robot...**

1. must not injure a human being or let him suffer an injury
2. must obey the orders given by a human being, unless they are against 1
3. must protect its own existence, unless if it is against 1 or 2

PREDICTIONS

Isaac Asimov described some facts that decades later would become reality.

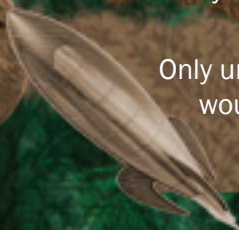

Communications would be audiovisual and available everywhere thanks to smartphones

Although not very good, there would be robots. Thanks to that technology cars with robotic brains would be created

Furniture kitchen would automatically prepare food and coffee. In addition, yeast and algae could be produced chemically with different flavours

Only unmanned ships would arrive at Mars

**SAAC
ASIMOV** was
born in Russia, and
later he and his fam-
ily left to Brooklyn

BIRTH
1920
Petrovichi

WORK
500+
from which
I, robot and *The Foundation*
are highlighted

DEATH
1992
New York

he has left us an
important legacy of
science fiction and
scientific spreading

*Isaac
Asimov*

Doctorated in
Biochemistry and associated
at Boston University.
